

contextualizing diverse knowledge

A platform for knowledge based gig-economy

Awase Khirni Syed ^{Ph.D.}

Problem

- Research and Patent publications are only published predominantly in English.
- Editors and peer reviewers do not get paid for their efforts
- Lack of diversity in scientific community
- High costs of publishing and subscription in peer reviewed research journals.
- Need for bilingual (Native and English) publication to disseminate knowledge to the masses.
- Equal access to scientific knowledge
- Library access is available only to university affiliates.

Problem (Linkedin Testimony)

Peer reviewers do not get paid for their review. It is the editors who get paid.

Jaka Vrhovnik I've never had to pay a publisher to consider my work. That sounds very predatory and you should avoid those publishers.

4d ***

The cost of research has already been undertaken by the people doing it (or sponsoring it).
